Central balanced swell pedal

All display pipes are speaking.

“This is a nice instrument, in quite good condition but is in need of overhaul”. It would suit as a house organ.

The small congregation is unable to fund the overhaul and so has reluctantly decided to offer the organ for sale. The church is due to be refurbished shortly, and the organ must be removed.

Care has been taken to provide accurate information, but the Methodist Organ Advisory Service is not responsible for errors.

Buyer makes all arrangements for dismantling, packing and transport.

Offers to the church contact, please.
